

Utterance models in dialogue systems

MOUŠEK, R., EKŠTEIN, K. Utterance models in dialogue systems. In *Information Technologies & Control*. Prague: Academy of Sciences of the Czech Republic, 2003. s. 26-26. ISBN: 80-239-1333-6

The paper deals with a building of semantic used as an interface between the module of linguistic analysis and dialogue manager. The syntactic and semantic analysis is based on the theory of microsituations and utterance models.
