

# Signature verification using unsupervised learned neural networks

MAUTNER, P., MATOUŠEK, V., ROHLÍK, O., KEMPF, J. Signature verification using unsupervised learned neural networks. In *Artificial Neural Networks in Pattern Recognition*. Florence: University of Florence, 2003. s. 71-75.

---

The Carpenter-Grosberg's ART-2 and Kohonen's Selforganizing Feature Map (SOFM) have been developed for the clustering of input vectors and have been commonly used as unsupervised learned classifiers. In this paper we describe the use of these neural network models for signature verification. The architecture of the verifiers and achieved results are discussed here and ideas for future research are also suggested.
